Incidental Survey

Primary surveyor:	Jane Doe		Experience:		Beginner		Call Codes: 0 - No frogs heard; 1- Calls not overlapping and # of calling frogs can be accurately counted; 2- Some calls overlapping but the number of calling frogs can be reliably counted; 3 - Full chorus with continuous overlapping calls indistinguishable from one another.						
Other Surveyors:													
	Estimated WCF Breeding Pond Location			Survey Conditions			Species Call Code (highest code heard)						
Date	Latitude (ex: 45. 12345)	Longitude (ex: -80. 12345)	Start Time (24h)	Air Temp (°C)	Wind Speed	Precipitation	Background Noise	Western Chorus Frog	Wood Frog	Spring Peeper	Northern Leopard Frog	American Toad	Notes (presence of predators or invasive species, etc.)
04/13/2022	45.12345	-80.12345	13:00	15	1	0	1	1	0	0	0	0	WCF calling from small flooded ditch

Incidental Survey

Primary Surveyor Experience:

Novice - No frog call survey experience **Beginner** - 1 season of surveys **Intermediate** - 2-5 seasons of surveys **Expert** - More than 5 seasons of surveys

Precipitation:

N - none

LR - light rain

MR - moderate rain

HR - heavy rain

Wind Speed (Beaufort Scale):

0 - smoke rises vertically

1 - smoke drifts

2 - leaves rustle

3 - light branches sway

4 - branches move

Background Noise:

- 0 No noise
- 1 Distant (e.g. traffic or animal calls including other frogs in distance)
- 2 Faint (e.g. few cars pass nearby, periodic animal calls, wind rustling grass or cattails)
- 3 Moderate (e.g. frogs still heard well but there is fairly consistent noise from cars passing, birds calling, wind rustling vegetation)
- 4 Consistent (e.g. frogs can be heard but not easily and there is continuous noise from animals, traffic or wind)
- 5 Loud (e.g. ability to hear frogs is severely compromised due to continuous loud noise from highway traffic)
