

INTENTIONAL SURVEYS

Primary Surveyor:				Site ID:							
Primary Surveyor Experience:				Listening Station Location							
Other surveyor(s):				Latitude (ex: 45. 12345):							
				Longitude (ex: -80.12345):							
Survey #	Date	Start Time (24h)	Survey Conditions				Species Call Code (highest code heard)				
			Air Temp (°C)	Wind Speed	Precipitation	Background Noise	Western Chorus Frog	Wood Frog	Spring Peeper	Northern Leopard Frog	American Toad
1											
2											
3											
4	<i>(Optional)</i>										
<p>Primary Surveyor Experience: Novice - No frog call survey experience; Beginner - 1 season of surveys; Intermediate - 2-5 seasons of surveys; Expert - More than 5 seasons</p> <p>Wind Speed (Beaufort Scale): 0 - smoke rises vertically; 1 - smoke drifts; 2 - leaves rustle; 3 - light branches sway; 4 - branches move *Do not survey in >3</p> <p>Precipitation: N - none; LR - light rain; MR - moderate rain; HR - heavy rain *Do not survey in MR or HR</p> <p>Background Noise: 0 - No noise; 1 - Distant (e.g. traffic or animal calls including other frogs in distance); 2 - Faint (e.g. few cars pass nearby, periodic animal calls, wind rustling vegetation); 3 - Moderate (e.g. frogs heard well but there is fairly consistent noise from cars passing, birds calling, wind rustling vegetation); 4 - Consistent (e.g. frogs can be heard but not easily and there is continuous noise from animals, traffic or wind); 5 - Loud (e.g. ability to hear frogs is severely compromised due to continuous loud noise from highway traffic).</p> <p>Call Codes: 0 - No frogs heard; 1- Calls not overlapping and # of calling frogs can be accurately counted; 2- Some calls overlapping but the number of calling frogs can be reliably counted; 3 - Full chorus with continuous overlapping calls indistinguishable from one another.</p>											

Notes (estimated WCF breeding pond locations (ex: Lat. Long.), presence of predators or invasive species, etc.)
